

Curriculum Vitae

Objective

Our mission at Allied Laboratory Animal Care Consulting Services is to develop responsible and ethical laboratory animal care and use programs which benefit the well being of animals while mutually working together with laboratory animal personnel to accomplish their facility's mission.

Education/Background

ALACCS, as a collective, has an education background focusing on laboratory animal medicine, computer science, and business management. We have a diverse background including being animal care technicians, IACUC Chairpersons, and Principal Investigators, to management of warehouses, homeowner's associations, and entire laboratory animal programs. We own biotechnology and computer consulting service companies. In 1995 we co-founded a private school for 6th thru 12th grades with an emphasis on biotechnology. We now serve on the Board of Trustees of the school which has recently become a charter school.

History

ALACCS was founded in January 2006, as a response for the need of biotechnology companies asking for assistance with the writing of Program Descriptions for submission to the Association for the Assessment and Accreditation of Laboratory Animal Care (AAALAC) International and for assistance with customized support to help achieve their important goals faster.

Area of Specialization

ALACCS specializes in assisting institutions with the process of obtaining AAALAC accreditation from the development of a highly organized Program Description through the Site Visit and Post Site Visit Communication. We assist in Standard Operating Procedure (SOP) development and Program development (Occupational Health and Safety, Training, ect.) utilizing current industry Best Practices. We develop Protocols. We conduct third party program and facility reviews to evaluate for compliance with applicable regulations including Post Approval Monitoring and grant congruency. We assist with Risk Assessments and Disaster Planning. We also have 25+ years of IACUC experience including training and can serve on IACUCs. We place non-affiliated IACUC members. We can interim manage a laboratory animal facility efficiently and effectively. We customize our services to the needs of our clients.

Skills

ALACCS is highly organized and thorough. We have a proven ability to adapt to new and challenging situations. We have advanced mechanical and analytical aptitude. We have excellent communication skills which includes ongoing dialogue throughout a project. We have 25+ years experience in responsible and ethical laboratory animal management and compliance with regulations. We have an outstanding problem-solving ability. We are extremely computer literate (Microsoft Word, Outlook, Excel, Access, PowerPoint, FrontPage, Adobe Professional, etc) and can easily adapt to a facility's documentation and software. We regularly participate in continuing education opportunities. We are seasoned international travelers.
